Experience

SoftNet (Junior Software Developer, Jun 2024 - Present)

- Maintained Java Spring backend, ensuring system reliability, and developed a new client management system for hotlines, using Angular with nearly 100% test coverage, simplifying bug report handling.
- Implemented Docker to create standardized development environments, reducing the time and steps required to initialize a local instance from 7 to 3 and accelerating the onboarding of new programmers.
- Achieved full industry compliance by implementing recommendations from software audits and collaborating with the team to establish new security processes.
- Oversaw the vulnerability lifecycle by leveraging GitLab's security pipeline for automated SAST/DAST scanning, secret detection, and vulnerability prevention on merges, improving overall system integrity.

SoftNet (Intern, Nov 2022 - Dec 2022)

- Developed Matplotlib visualizations to analyze fraud detection simulation results, helping banks optimize their systems to minimize false positives.
- Designed and built Python-based visualizations for over 1000 bank configuration parameters, enabling cooperative banks to effectively fine-tune their system settings.

WeImpact.AI (Full-Stack Developer, Apr 2022 - Dec 2023)

- Developed key features for a full-stack application, which included a Node.js and Firebase backend and a dynamic SvelteKit frontend, supporting hundreds of daily operations.
- Managed the maintenance and updates for company websites, ensuring their reliability and currentness.
- Developed a new user onboarding feature to streamline registration while simultaneously recommending and implementing a free, open-source alternative that eliminated a \$50 monthly licensing fee.
- Optimized database read operations, simplifying the core data-fetching logic to reduce code complexity and lower cloud function costs on a per-operation basis.

Skills

- **Programming Languages:** Java, TypeScript, Python, Rust, Nix, Bash
- **Frameworks & Libraries:** Spring (Java), Angular, SvelteKit, React, React Native, Node.js, Android
- **Tools & Technologies:** Linux, Git, GitHub, GitLab, Docker, Firebase, Vim
- **Languages:** Polish - Proficient, English - Fluent, German - Basic

Education & Qualifications

- Bachelor of Engineering in Cybersecurity AGH University of Krakow (2024 - Present)
- Information Technology Technician Zespół Szkół Łączności (2019 - 2024)
- Java Mobile App Development Certification
- Wazuh Tool Administration Training

Achievements

- **Winner, Motorola Science Cup (2021):** Won as part of a team in a three-stage general computer knowledge competition, with the highest score.
- **Second Place, CyberSkinner Challenge Poland (2023):** Placed second in a three-stage Capture The Flag (CTF) team competition.
- **Laureate, Olimpiada Innowacji Technicznych w Telekomunikacji i Informatyce (2024):** Ranked among the top performers in the three-stage telecommunications and computer science olympiad.
- **Prymusi AGH (2024):** Nominated to be part of the prestigious Prymusi AGH program.
