Experience

Waymo (Software Engineer Intern, Jul 2026 - Sep 2026)

- Built a high-throughput C++ simulation service orchestrating thousands of lightweight agents using statistical demand modeling. Designed fully deterministic, reproducible traffic generation to enable automated verification of mission-critical platforms.

SoftNet (Software Developer - formerly Intern, Jun 2024 - Jun 2026)

- Implemented Docker to create standardized development environments, reducing the time and steps required to initialize a local instance from 7 to 3 and accelerating the onboarding of new programmers.
- Maintained Java Spring backend, ensuring system reliability, and developed a new client management system for hotlines, using Angular with nearly 100% test coverage, simplifying bug report handling.
- Automated the vulnerability lifecycle using GitLab CI/CD (SAST/DAST) and secret detection. partnered with auditors to implement industry-standard security protocols.

Formation x Waymo Fellowship (Fellow, Jul 2025 - Jan 2026)

- Mastered advanced algorithmic optimization, data structures, and scalable architecture for high-availability distributed systems.
- Refined code quality and architectural standards through intensive technical deep-dives and reviews by Waymo and FAANG mentors.

WeImpact.AI (Full-Stack Developer, Apr 2022 - Dec 2023)

- Developed key features for a SvelteKit/Firebase app, optimized database read operations to reduce cloud costs, and implemented an open-source onboarding flow that cut monthly licensing fees.

Skills

- **Programming Languages:** Java, TypeScript, Python, Rust, Nix, Bash
- **Frameworks & Libraries:** Spring (Java), Angular, SvelteKit, React, React Native, Node.js, Android
- **Tools & Technologies:** Linux, Git, GitHub, GitLab, Docker, Firebase, Vim
- **Languages:** Polish - Proficient, English - Fluent, German - Basic

Education & Qualifications

- Bachelor of Engineering in Cybersecurity AGH University of Krakow (2024 - Present)
- Information Technology Technician Zespół Szkół Łączności (2019 - 2024)
- Java Mobile App Development Certification
- Wazuh Tool Administration Training

Achievements

- **Winner, Motorola Science Cup (2021):** Won as part of a team in a three-stage general computer knowledge competition, with the highest score.
- **Second Place, CyberSkinner Challenge Poland (2023):** Placed second in a three-stage Capture The Flag (CTF) team competition.
- **Laureate, Olimpiada Innowacji Technicznych w Telekomunikacji i Informatyce (2024):** Ranked among the top performers in the three-stage telecommunications and computer science olympiad.
- **Prymusi AGH (2024):** Nominated to be part of the prestigious Prymusi AGH program.
